Art Unit: 1623

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1, 4-23, 33-37, 39 and 46-63 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-53 of copending Application No. 10/942604. Although the conflicting claims are not identical, they are not patentably distinct from each other because the methods of the copending application are encompassed by the methods in the present application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1, 4-23, 33-37, 39 and 46-63 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-64 of copending Application No. 10/942197. Although the conflicting claims are not identical, they are not patentably distinct from each other because the methods of the present application are encompassed by the methods in the copending application.

Art Unit: 1623

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Claims 1, 4-23, 33-37, 39 and 46-63 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 24-59 of copending Application No. 10/828379. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method claims of the present application are encompassed by the methods of the copending application.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Applicant's arguments filed July 15, 2005 have been considered but have not been found persuasive because Terminal Disclaimers over the copending applications have not been filed.

Claims 1, 6, 9, 10, 15-22 and 57-63 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 6 are substantial duplicates. Note that claim 1 is limited to administering at least one subsequent dose at least 5 to 10 days after the first dose.

Claims 9, 10, 12, 15-22, 57-63 are indefinite in that it is not clear whether the terminology "the therapeutically effective dose" refers to initial dose or to subsequent dose.
